~~1 APR 1977~~

MEMORANDUM FOR: NIO/Strategic Programs

FROM: Director of Central Intelligence

1. I think we should begin to develop a "scorecard" approach for each of the areas of concern of the working groups that have been established between the Soviet Union and the United States:

- a. Comprehensive test ban.
- b. Chemical weapons.
- c. Notification of missile test firing.
- d. Anti-satellite weapons.
- e. Civil defense.
- f. Military limitations in the Indian Ocean.
- g. Radiological weapons.
- h. Conventional weapons.

2. I realize that some of these, like conventional weapons, are rather vague. To stay ahead of the game, though, I think it would be helpful to start thinking what types of limitations might be agreed, and then what our verification techniques and capabilities would be.

3. In due course, I would also like to develop a paper for each of these topics which would attempt to predict Soviet reactions to proposals in these areas, either from what we know of their past responses or from our analysis of the importance of particular issues to them.
